

A Minimalist Demographic-Epidemiological Model for Projecting HIV/AIDS

Griffith Feeney and Basia Zaba
Draft Table of Contents: 1999-12-04

- 1 Introduction
 - 2 Model design (detail below)
 - 3 Program Design
 - 4 Illustrative Application: Uganda
 - 5 Conclusion
 - 6 References
 - 7 Appendices
 - 1 Program code
 - 2 Excel files
 - 3 Data files
 - 4 Comparison with differential equation formulation
 - 5 “Son of Epimodel”
-
- 2 Model design (detail: see draft)
 - 1 Overview
 - 2 Defining population state
 - 1 HIV/AIDS status
 - 2 Age
 - 3 Duration of infection
 - 4 Sex
 - 5 Sexual activity status
 - 6 Representation and notation
 - 3 Transformation Equations
 - 1 Change of state dynamics
 - 2 Defining the transformation equations
 - 3 *More to come ...*
 - 4 The New Infection Function
 - 1 *To come ...*
 - 5 Outputs
 - 1 *To come ...*
